Safety You Can Trust

SPILL TRAINING & SURVEY BY HAZCHEM

WHAT TRAINING DO WE PROVIDE?

We are currently able to offer 3 levels of spill training, these are as follows:

- **L1SKT Basic Spill Kit Training** - A spill kit course designed for individuals and operatives that may be employed in a shop floor location who must respond to minor day to day spills and leaks in their own work environment.
- **L2SRT First Responder** - A spill response course for individuals who may either act as first responders to a spillage incident or as members of a spill response team.
- **L1SKTTT Trainer Training for delivery of Spill Kit Training** - This course enables the trainer to deliver a competent course to work colleagues at onshore facilities who may be called upon to deal with day to day spills in their workplace.

WHAT DOES THE SURVEY INCLUDE?

The survey will include a full assessment of your site focusing on the handling and storage of liquids. We will supply you with a full report with our findings, photographs and our recommendations. The areas we will focus on are as follows:

- Your sites drainage system
- The types of liquids stored on your site
- Bulk / Drummed storage and any secondary containment
- The procedures you follow in which you load, unload and transport liquids
- The processes in which you currently deal with spillages
- How you handle waste liquids
- Training that you provide to your employees

OUR PACKAGES

L1SKT BASIC SPILL KIT TRAINING - 1/2 DAY

Learn
how to
effectively
use spill
kits

This session is suitable for 15 people per session

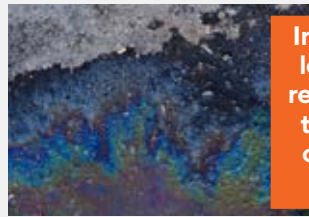

The L1SKT spill kit training course contains up to 3 separate sessions. Each session is a complete spill kit mini course. The course can therefore offer training for to up to 45 individuals.

Each session lasts for 50 minutes plus a 10 minute break between sessions.

Course Objectives

1. To provide operatives with the knowledge of how to safely use spill products on your site.
2. Highlight the importance of having a simple, effective, response action plan.
3. Stress the importance of preventing spillage escape and reducing impacts on the environment.

L2SRT FIRST RESPONDER TRAINING - 3 HOUR

Improve
level of
response
to time
critical
spills

This testing is suitable for a max of 12 people

The L2SRT First responder course is made up of 1 x 3 hour session.

Course Objectives

1. Provide an improved level of response to emergency spills and thereby help to reduce corporate exposure to risks of polluting the environment and consequent costs.
2. Improve the knowledge and understanding of the physical dangers of spillage, typical routes of escape from the site and how to safely use containment and adsorbent products to effectively control a spill.
3. Create awareness of individuals' moral and legal responsibilities for causing pollution from spillage entering the wider environment.

L1SKTTT TRAINER TRAINING - 4.5 HOUR

Gain
confidence
in advising
others how
to use spill
equipment

This testing is suitable for a max of 8 people

The L1SKTTT foundation course in spill response before moving on to present a course that will equip attendees to deliver the L1SKT. Certificate validity - 2 years from date of training.

Attendees will get all information presented supplied on a memory stick & a certificate of attendance.

Course Objectives

1. Provide trainers with an adequate level of subject knowledge.
2. Impart confidence to train colleagues to achieve a safe level of spill response.
3. Demonstrate understanding and proper use of all site spill response equipment.

A pass/fail questionnaire will be presented as conclusion. & Attendees will be expected to actively participate in the course and will be required to prepare and make a 30min presentation.

SURVEY

The survey will give you the guidance you need to ensure that you are compliant with all regulations. For further information and for a quotation please contact one of the team.
